

DRINKING WATER WARNING

Boil Your Water Before Using

Rice Road, 1st Avenue, and 10444-10542 Hwy 126 Only

Due to loss of water pressure in the distribution system from August 31, 2026 (for two to three weeks), potentially harmful bacteria could be present in the water supply. If these bacteria are present, they could make you sick and are a particular concern for people with weakened immune systems. The affected area is limited to the streets and addresses above, but if you have received this notice directly from your water provider, you are in the affected area.

Do not drink the water without boiling it first.

Customers should bring water to a rolling boil for 1 full minute, allow the water to cool before using, and store the cooled water in a clean container with a cover. Customers should use boiled water that has cooled or bottled water for:

- Drinking
- Brushing teeth
- Washing fruits and vegetables
- Preparing food and baby formula
- Making ice
- Cleaning food contact surfaces

This is due to the planned mainline replacement in the Rice Road neighborhood. We will inform you when tests show no bacteria present and you no longer need to boil your water. We anticipate restoring regular service within three weeks.

This boil water advisory is a precaution. To limit risk to health, customers should follow the instructions contained in this advisory.

For more information, go to www.mapletonwd.org or contact Jordan Walker at Mapleton Water District, 541-268-4348 or info@mapletonwd.org. General guidelines on ways to reduce the risk of infection by contaminants in drinking water are available from the EPA Safe Drinking Water Hotline at 1-800-426-4791, the Oregon Health Authority, Drinking Water Services at 971-673-0405, or email Info.DrinkingWater@odhsoha.oregon.gov
